CREDITS
120 cr

TRINKET
Old broken sextant

PATCH
"COMING BACK IS OPTIONAL"

TRAUMA RESPONSE
Once per session, you can gain Advantage on a Panic Check.

CONDITIONS AND NOTES

PLAYER ONLY

ALDA REYES

TEAMSTER / Captain · WIDOW / 41 years

BOND

Nuno saved you during an impossible boarding action; you owe him your life.

PERSONAL SECRET

You received a 10,000 cr advance to recover viable Vesperine. Lose the contract and you lose the Widow.

HARD CHOICE

When they ask you to take off and leave someone behind, who will you call your crew?

PERSONAL NOTES

NUNO "HINGE" SILVA

BOND

VERA-04 is your friend, though others only see a machine.

PERSONAL SECRET

You worked for a NOXUM subsidiary. You know their business priorities.

HARD CHOICE

You can order a full quarantine, but you know who it would doom.

PERSONAL NOTES

OPERATIONS ORDER

INSPECTION CONTRACT

PUBLIC

STATED OBJECTIVE

Use independent protocols to reproduce four properties of material V-17, designated Vesperine: mechanical integrity, electrical remanence, isotopic provenance, and substrate dependence.

HERMES RESOURCES

10 sealed capsules, 4 certified controls, 40 minutes of battery life. Recharge in the laboratory or Reactor: 15 minutes.

TARGET SAMPLE

Recover 200 g in a sealed container. Record the operator, room, time, capsule number, and seal for each sample collected.

PAYMENT

20,000 cr for the operation. 5,000 cr for each validated report with a documented chain of custody.

SAFETY CLAUSE

Crew safety takes priority over material recovery. Any contamination requires a documented chain of custody.

PUBLIC

VALIDATION | DATE / TIME | SIGNATURE

LOGISTICS

CV-11 MANIFEST

INTERNAL

DECLARED ORIGIN	Survey of the outer CÍCLOPE-3 belt; batch classified as nonreactive silicate sediment.
MASS AND ROUTE	10 kg. Barge IMAGO 5 → LIMEN-9 / Storage 08. Custodian: Edda Quill.
CERTIFICATION	No detectable metabolism. Exempt from biological quarantine. Certificate issued before physical receipt of the batch.
INVENTORY NOTE	New containers accumulate more material than was removed from the initial sample. The difference is not logged as incoming cargo.

Run a mass balance. — E. Q.

SAMPLE AND OPERATOR

Operator: _____ Time: _____

Room: _____ Capsule No.: _____ Seal: _____

CONTROLS

Negative control: _____

Positive control: _____

TESTS

- ☐ A · Integrity · 12 min — ☐ valid control
- ☐ B · Remanence · 8 min — ☐ valid control
- ☐ C · Isotopes · 14 min — ☐ valid control
- ☐ D · Nutrients · 10 min — ☐ valid control

NOTES

Hypothesis: _____

Observed result: _____

Possible contamination: _____

A test without a control may offer a lead, but it does not prove a hypothesis.

PUBLIC

VALIDATION | DATE / TIME | SIGNATURE

HERMES · RESULTS

STRUCTURAL RESPONSE

INTERNAL

TEST A · INTEGRITY

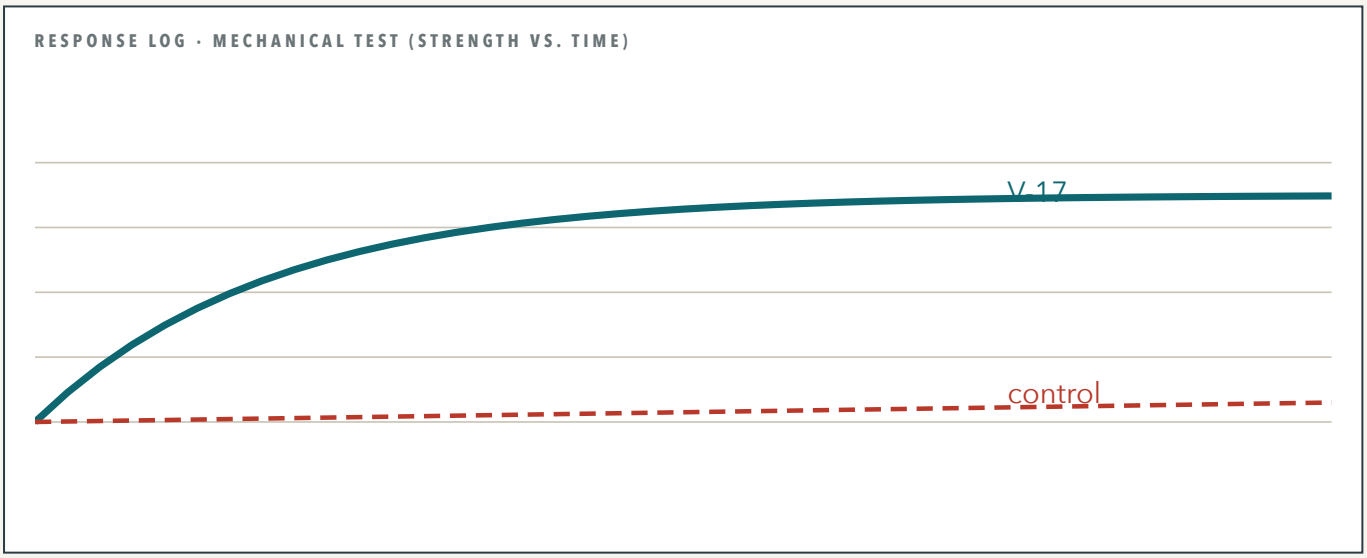

A cut sheet recovers almost all its original strength. The control polymer remains cut. The sterilized sample recovers more slowly.

TEST B · REMANENCE

After power is removed, three staggered pulses are detected that do not belong to the current stimulus. The pattern partially matches a station file.

LIMITED INFERENCE

The sample reorganizes itself and retains information. Neither result establishes that the material is conscious or determines its origin.

FILE COPY

ANALYSIS · TRACERS

MASS BALANCE

INTERNAL

TEST C · PROVENANCE

Recent deposits incorporate isotopic signatures from LIMEN-9's recirculated water and organic medium. They do not come solely from batch CV-11.

TEST D · MEDIA

Relative growth: organic medium 195%, saline solution 47%, dry control 5%. Only the organic medium sustains accelerated growth.

PRELIMINARY CONCLUSION

A local synthesis or secretion process requires resources from the facility. The geological manifest does not account for all the material observed.

FILE COPY

SECURITY · QUARANTINE

ISOLATION ORDER

INTERNAL

CIRCUITS	Isolate ventilation and water circuits between Decks A and B; reopen only after diagnostic clearance.
PERSONNEL	All evacuations require a medical examination and Security clearance, or a manual override of exit controls.
MATERIAL	Transport all V-17 in numbered, sealed containers. Do not remove open or wet samples.
EXCEPTIONS	Evacuation of injured personnel may be authorized with signatures from medical staff and Security.

It's not a disease. I don't know what it is. Don't let anything that grows get out.
— D. V.

FILE COPY

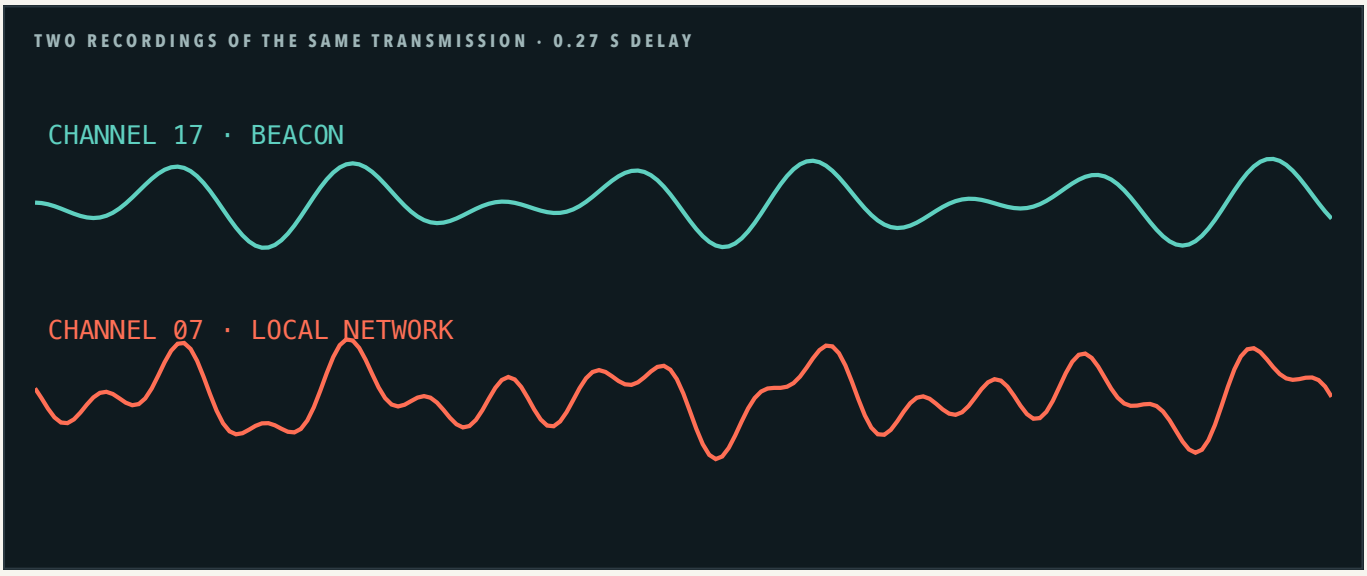

VALIDATION | DATE / TIME | SIGNATURE

TELEMETRY · COMMS

TWO VERSIONS OF THE SOS

INTERNAL

CHANNEL 07 · LOCAL NETWORK · 02:14:03	“We’re still here… the laboratory… don’t send…” The waveform shows a second, overlapping voice offset by 0.27 s.
CHANNEL 17 · EXTERNAL BEACON · 02:14:03	“We’re still here… the laboratory… don’t send…” No second voice. The original signal is identical until it enters the repeater.
OPEN HYPOTHESES	Processing error, file modification, or interference by the connected substrate. The voice does not spread infection.

FILE COPY

FORENSIC MEDICINE

TISSUE REPORT 12-C

INTERNAL

ANATOMICAL SAMPLE

Partially formed human tissue on a black matrix, with no signs of transplantation or surgery. Structural filaments match V-17.

INCOMPLETE IDENTIFICATION

Partial match with Gael Arce; neither identity nor state of consciousness is certified.

LIMITATIONS

This report confirms the fabrication of tissue consistent with human tissue. It does not, on its own, prove that a survivor is a copy.

y Report 12-C. V-17 filaments present in incomplete human tissue. This re- not establish continuity of identity.

FILE COPY

RESTRICTED DIRECTORATE

ORPHEUS PROTOCOL

CONFIDENTIAL

ACTUAL ORIGIN

V-17 is a structural secretion of the exobiological organism contained in NEST ZERO. CV-11 was falsely logged as geological cargo by executive order.

ORDER 14-B

Keep the specimen fed. Do not destroy the matrices without authorization from the ORPHEUS Committee.

HUMAN BYPRODUCTS

Reconstructions with autobiographical continuity are considered recoverable research material and tolerable byproducts. Do not inform the expedition team until testing is complete.

RECOVERY INSTRUCTION

Recover 200 g of viable compound and, if possible, a conscious reconstruction. The contract sent to the Widow deliberately omits this condition.

ORPHEUS

CONTINUITY PROGRAM
RESTRICTED COMMITTEE

CONFIDENTIAL

SPECTROMETRY · INTERFEROMETRY

FILAMENT TEST

FORM

PERSON EXAMINED

Name: _____ Time: _____

Room: _____ Seal: _____ Witness: _____

PROCEDURE

Filament spectrometry (room 10): 10 min and a negative control. Calibrated interferometry (room 13): 2 min without moving.

RESULT

□ NEGATIVE, valid at this time: no V-17 filaments.

□ Valid POSITIVE: V-17 matrix detected.

□ INCONCLUSIVE: no control or contaminated sample.

FORENSIC NOTE

A positive result establishes the composition of the tissue examined. It does not predict future behavior or require its destruction. An earlier negative result does not rule out a later replacement.
